

Keeping Your Belongings Safe & Secure

Recording the details of your household items and contents can increase your chances of having them returned to you if they are stolen.

We have put together a *Marking + Recording Valuables Form* to get you started in recording your items. The form can be downloaded via the QR code below, as a digitally editable PDF, a Google Sheet or an Excel spreadsheet, so that you can fill in and maintain an electronic copy.

You can also protect your property and belongings by:

- Engraving tools and bicycles with your Driver's License number.
- Taking photos of any unique items, such as jewellery and art works, and saving these to your files as well.
- Keeping receipts, warranties, and valuations in a safe place.
- Taking photos or videos of jewelry, art, and other precious items.
- When out and about, keeping your bags containing valuables, wallets, purses etc secure and close to your body.
- Always locking your vehicles when you leave them and taking your keys with you.
- Keeping in contact with your neighbours and letting one another know if you see anything unusual.
